PROJECT TOPIC: NeuroVision AI Powered Interview Platform

Programme: MCA

Project Group Members:
1. Anugya Chauhan (D-09/ 2484200225)
2. Vaishnavi Saxena (D-42/ 2484200209)

Project Supervisor: Mr. Rohit Agarwal, Assistant Professor

Objective: The purpose of developing this project is to transform hiring through intelligent assessment, real-time analytics, and bias-free evaluation. It leverages an AI-powered question engine that dynamically generates role-specific questions and adapts to candidate responses in real time. It also provides chart-based feedback analysis for each question, with downloadable reports for candidates.

Hardware Requirements

- To run the platform smoothly, the following hardware is needed:
- Processor: Intel i5 or higher.
- RAM: Minimum 8 GB.
- Storage: 256 GB SSD or more.
- Webcam and microphone for video recording.

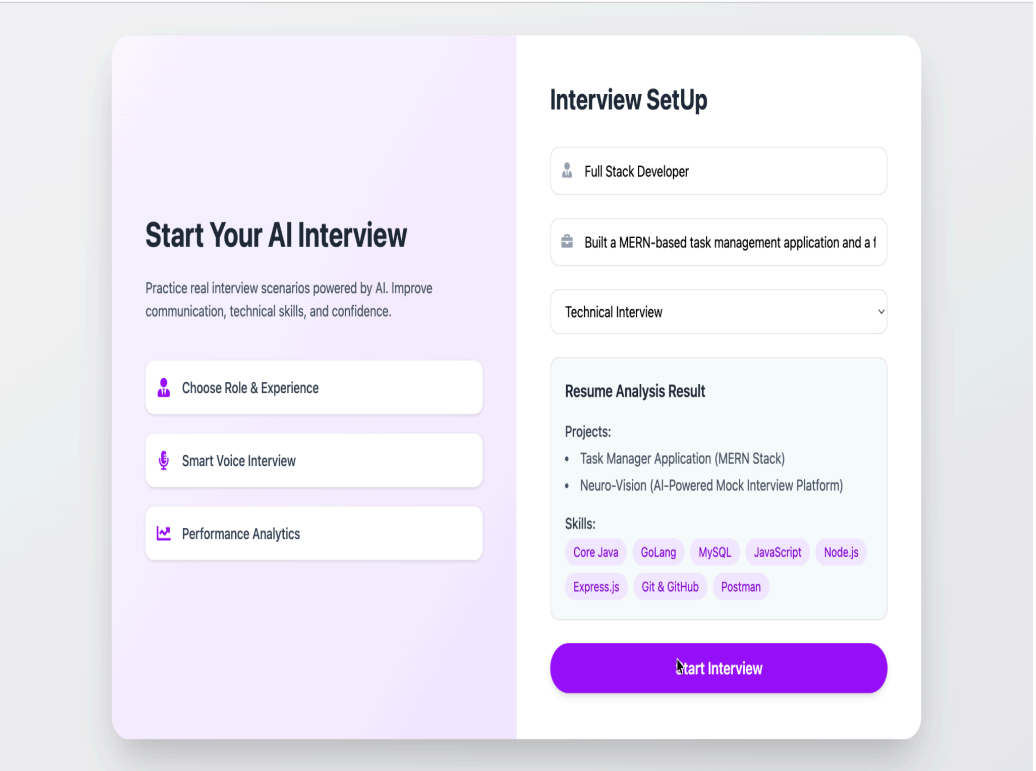
Software Requirements

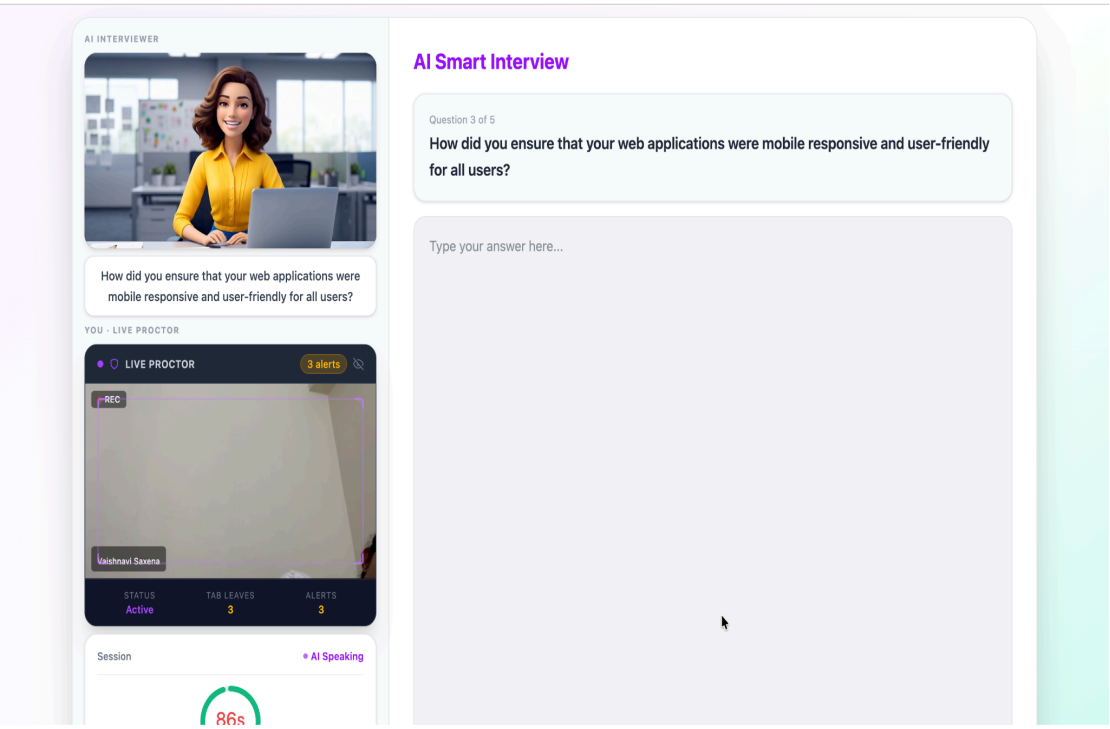
- The platform requires modern tools and frameworks:
- Operating System: Windows 10 or macOS.
- Languages/Frameworks: ReactJS, Node.js.
- AI Tools: n8n , Speech Recognition APIs.
- Database: MongoDB
- APIs: OpenRouter API

Abstract: The purpose of developing this project is to transform hiring through an AI-powered interview platform that ensures intelligent assessment, real-time analytics, and bias-free evaluation. It features a

dynamic question engine that adapts to candidate responses, along with multi-dimensional scoring for consistent and objective rankings. The system provides detailed, chart-based feedback with downloadable reports, and conducts structured interviews with a mix of easy, medium, and hard questions across technical and HR domains, ensuring an efficient and comprehensive evaluation process.

Outcome:





AI INTERVIEWER
How did you ensure that your web applications were mobile responsive and user-friendly for all users?
